### Dear Clients and Colleagues,

As C2D enters its 9th year in business, I wanted to take this opportunity to remind you of C2D's small business status and experience-based skills for NEPA, dredging, and civil works projects. I look forward to C2D contributing to your next project.

All my best to you and your family,

## Corry T. Platt, CEP

environmental consultant

O: 919.362.3700 C: 919.656.5799

### Committed to the profession...

Corry serves as a Board of Trustees member to the Academy of Board Certified Environmental Professionals.

### Tailored to meet your need...

C2D's familiarity with project development as well as regulatory requirements brings a unique skill to your project team. C2D brings a project history in over 20 States, US Territories, Latin and South America.

C2D maintains general liability, contractor pollution liability, and professional liability insurance coverage of \$1 million.

Learn more about C2D's pre-construction and construction-phase offerings online at [www.concept2delivery.com](http://www.concept2delivery.com)

# Environmental Small Business

**C2D knows planning and environmental consulting for civil works projects... with contract experience on USACE projects!**

## Featured Offerings...Dredging, NEPA, Regulatory, Natural Resources

- Planning and permitting hydraulic and mechanical dredging projects—from few thousand to millions of cubic yards with real life construction-phase experience.
- Sediment characterizations—sediment and water collection, laboratory coordination, data reduction and interpretation for aquatic and marine projects—Tier I, II, and III Evaluations— vibracores, core logging, sample homogenization and compositing, QA/QC.
- NEPA / SEPA Environmental Assessments and Environmental Impact Statements for mechanical and hydraulic dredging projects...as well as other project types for USACE, DOE, FERC and various States.
- Contamination Assessments, Environmental Site Assessments, FUSRAP and FUDS sites, HAZWOPER
- Dredged Material Management— ocean disposal, upland CDF placement, CAD, marsh restoration, stabilization and reuse as engineered fill
- Cultural Resources studies (Phases I and II), recovery/mitigations (Phase III)—archaeological (terrestrial and aquatic) and historical sites.
- Biological Assessments/Opinions for Endangered Species consultations with USFWS
- Ecosystem restoration, wetland delineation and mitigation design/construction
- Construction costing studies, cost-benefit studies
- Memoranda of Agreement, Programmatic Agreements, Technical Specification writing
- Remote Sensing interpretation and implications—side scan sonar, magnetometer, ground penetrating radar, mapping
- Environmental training, team staff mentoring (direct and indirect reports)

### USACE PROJECT LOCATIONS

- Southeast: NC, VA, GA, FL
- Northeast: MA, RI, NJ, PA, WV
- Caribbean: PR, USVI

### PROJECT DIVERSITY

- Shallow-draft channel maintenance
- Deep-draft channel deepening and maintenance
- LNG import terminal
- Land development
- Economic development
- Inland reservoir dredging
- Maritime/channel dredging/marina
- Water/wastewater
- Power transmission
- Aviation/transportation

### LEADERSHIP PROFILE

C2D is led by Corry Platt who contributes to each project. C2D brings experienced staff and associates to projects as well. From his beginnings as a research assistant in botany and ornithology, Mr. Platt's entry into the business sector investigating and remediating hazardous waste/Superfund sites in over 20 eastern States has grown through first-hand, 'on-the-ground' experience to include dredging, dredged material handling and disposal, coastal structures, endangered species, wetland and stream restoration, liability assessments and property transfers, cultural resources, and more.

- Certified Environmental Professional
- 18 years progressive professional experience
- BS, Biology, Muhlenberg College, Allentown PA
- Small, local projects to large, capital improvements to multi-state interdisciplinary projects

*Put C2D's decades of experience carrying environmental projects from early planning through permitting, agency coordination, design and technical specifications to construction to work on your team and its next project!*
